

## World Femininity Day 2012– Clittorati Ball How to make your Merkin

You will need:

Card paper

Fabric

Fabric pen

Brush

PVA glue

Curly Doll's hair or feathers, fake flowers a picture anything you want to represent your pubic area

Felt, rhinestones and anything else you want to use, go crazy!!

C String or just knickers

Hot glue gun or a needle and a thread

Begin with creating your base. This can be made out of a thicker card paper but I prefer using fabric craft interlining as it holds its shape better. I like my merkin to be a heart shape, but really it can be anything you like! Grab a fabric pen and color your base to match the dolls hair/feathers/flowers etc

Now, using a brush start applying a generous layer of PVA glue (you can get this in any stationary store) to your base. Don't worry about there being too much glue as PVA dries clear. You want the glue to become a little tacky so cut your doll's hair/feathers/flowers or picture in meantime. If you do use hair, firstly take some hair between your hands and rub it vigorously until it becomes "frizzy". This will make it less like doll's hair. Take your chosen material and put it onto your gluey base, pushing it in slightly as you go. Put this to one side and let it dry. If you want to speed this step up you can either put it on a radiator or use a hair dryer to dry it faster.

The rest is up to you! You can go with the traditional clitoris and vulva look and make it out of pink and red felt or use anything you feel like. Feathers, rhinestones, crystals, beads, sequins, fake flowers etc. All these things will make a great clitoris and a vulva.

Once this is done you can either stitch it or glue it (using a hot glue gun this time) straight onto your C string or your knickers.
